

Upgrade to TAE40110: Certificate IV Training & Assessment

TAE40110

Program information

This course is designed for students wishing to upgrade their training qualifications from either:

1. BSZ98: Certificate IV in Assessment and Workplace Training,
or
2. TAA40104: Certificate IV in Training & Assessment.

Under the TAE Training Package guidelines, both of the above qualifications will not be current after 17 June 2012.

Duration of program

The program has the potential to vary in both length and work requirement based on the currency and frequency of your training design, delivery and assessment performance.

For current trainers and assessors the likelihood is that you would complete some pre-course work, and then attend a half day facilitated workshop.

For trainers who are not current, the training gaps would be identified and then a training schedule developed for you.

Frequency of program

The programs run monthly in a public domain format or we can deliver this in-house on as required basis.
